### **About QuickRoots™**

*The microorganisms in QuickRoots™ have been shown to increase availability of certain plant nutrients and can increase plant nutrient uptake. QuickRoots™ releases plant available phosphorous which has been shown to increase root mass allowing the plant to explore a greater volume of soil. Increased plant nutrient availability will often lead to increased plant health and vigor which can translate into a yield response.*

*QuickRoots™ is applied to the seed. QuickRoots™ can be used in a wet or dry form and may even be applied to the seed up to 18 months in advance of planting.
